

Activity #7

Group #1:

Choose a behavior to teach through modeling and physical guidance. Discuss all the pertinent factors to consider to maximize the effectiveness of your program.

Group #2:

Discuss the four types of situational inducement and provide an original example of a behavior which could be modified by using each of the types of situational inducement.

Group #3:

Discuss the four phases of behavioral assessment. Choose a behavior to modify and describe how you would carry out a behavioral plan through all four phases.

Group #4:

Discuss the different approaches to recording behavioral data. Describe each approach and discuss when such an approach would be used. Discuss available tools to assist in behavioral assessment.
